

Sprint Plan 3

2/1/19

- As a user I want a website that gives me access to all of its features and is customizable.
 - Redesign feature pages with multiple graphs and list view: 20
- As a user I want to know what this website is about, and where the data comes from.
 - Add an about page to describe functionality and inform where we are scraping from: 5
- As a user I want to be able to customize the website features so that I can create an individualized graph that will help me analyze cs job stats.
 - Be able to render different views of the information gathered: 18
 - Be able to go on different pages that cater to different specifications of data visualization and categorization: 7
- As a user I want these graphs to be presentable and meaningful.
 - Add better plotly graphs: 5
 - Figure out how to present the data to users to recommend what to learn: 9

Total Points: 64
