  - Better graph presentation: 7
  - Data Analysis to figure out top 10 skills per category: 20
  - Data Analysis to determine helpful insights pertaining to a category: 20

*Sprint 1:*

- As a user I want a personalized experience on a job site that is not offered elsewhere.
- As a user I want a website that displays data consistently and accurately.

*Sprint 2:*

- As a user I want to use a website that works on across all my devices.
- As a user I want a website that gives me access to all of its features and is customizable.
- As a user I want to know what this website is about, and where the data comes from.

*Sprint 3:*

- As a user I want a website that gives easy access to all of its features and presents information to me in a very visible manner
- As a user I want to be able to view features that pertain to my particular interest so that I will have an individualized experience.
- As a user I would like information presented in various different ways that way I will not always have to view complicated graphs. (i.e. lists instead)

*Sprint 4:*

- As a user I want a website that is very easy to navigate through and looks good.
- As a user I would always like to know what the top skills in demand are.
- As a user I would like to have in depth analysis and insights on data pertaining to a certain category in particular.
