

Sprint 4 Review: JobStats

6/3/19

Actions to stop doing:

- Feature creeping, mostly adjusting and tweaking old features too much when they are not a priority.

Actions to start doing:

- Fixing bugs where necessary and light testing through monitoring the site.

Actions to keep doing:

- Using the website regularly to find faults. Think of future ideas.

Work completed:

- About page, UI for job listings, backend for job listings, differentiating between types of skills and coming up with a whitelist of skills, incorporating more BLS data, adding preset tiles.

Works not completed:

Work completion rate:

- For this sprint we planned to complete three user stories which we estimated would take 50 work hours. This sprint lasted 14 days during which we were fully able to complete all four user stories for a total number of 50 hours worked. This brings the daily rate of user story completion to 0.28 and the daily rate of hours worked to 3.57.
