Sprint 3 Review: JobTrends

11/19/18

Actions to stop doing:

- Coming up with too many features that are not feasible with the given time frame.
- Getting distracted when working together.

Actions to start doing:

- Meeting together in person more often to increase productivity. Even if we are working on separate tasks.
- Discussing the product vision clearly with the team
- Staying on task when working together

Actions to keep doing:

- Teammate support: we should continue providing technical help when requested by other team members, even when it isn't explicitly a shared task.

Work Completed:

- Formatting graphs to be dynamic
- UI Design layout
- Percent Value graphs
- Test the scraper
- Log the errors in a file

Work Not Completed:

- Make HTML buttons
- Functional search bar
- About page

Work Completion Rate:

For this sprint, we planned to complete two user stories, and estimated that this would take 40 work hours. This sprint lasted 7 days as we were running behind the rest of the class and were informed by the TA to align our sprints with the rest of the class. We were able to fully complete one user story, for a total number of 25 hours worked. This brings the daily rate of user story completion to 0.29, and the daily rate of hours worked to 3.6.
