Sprint Plan 1

Sprint 1:
- As a user I want a website that is scalable and works across multiple different devices
    - Gain familiarity with react: 12
    - Redesign web pages in react: 6
    - Connect Django with React Front End: 9
- As a user I want to view an extensive set of data in order for the information I receive to be the most accurate.
    - Change database model to psql: 5
- As a user I want to see the latest data everyday consistently.
    - Fix webscraper issues to perform consistently: 4
