Sprint Plan 3

2/1/19

- As a user I want a website that gives me access to all of its features and is customizable.
  - Redesign landing page with tile view: 20
- As a user I want to know what this website is about, and where the data comes from.
  - Add an about page to describe functionality and inform where we are scraping from: 5
- As a user I want to have an account feature that lets me save all my information and preferences.
  - Learn about different sign in methodologies (i.e. Google sign in): 3
  - Produce initial login page for new users: 15
- As a user I want to be able to customize the website features so that I can create an individualized graph that will help me analyze cs job stats.
  - Add ability to create and save custom graphs to the tile view: 18
  - Be able to save these graphs: 7
- As a user I want these graphs to be presentable and meaningful.
  - Add better plotly graphs: 5
  - Figure out how to present the data to users to recommend what to learn: 9

Total Points: 82
