Sprint Plan 2

Sprint 2:

- As a user I want to view meaningful trends in job data because it will help me learn valuable skills so that I am competitive in my job market.
    - Task 1: Connect scraping script to the database (3)
    - Task 2: Create daily scraper to collect data regularly (7)
    - Task 3: Populate the database with the data from Indeed (8)
    - Task 4: Come up with keywords (skills) (3)
    - Task 5: Filter data through elasticsearch to establish relationships (7)
- As a user I want clear visuals that represent job data because I want to easily analyse the relationships between skill sets in the tech industry.
    - Task 1: Learn how to use Plotly and display a graphic (7)
    - Task 2: Connect graph to django project landing page (7)
    - Task 3: Connect database to graph (8)
    - Task 4: Add button filtering functionality (9)
